TODAY'S NEWS

Treasuries Advance After BOJ Says U.S. Economic 'Uncertainty' Increasing

Aug. 30 (Bloomberg) -- Treasuries rose, erasing their losses from last week, after the Bank of Japan said "uncertainty" regarding the American economy is growing and Morgan Stanley cut its forecast for U.S. gross domestic product. U.S. government notes headed for a fifth monthly gain as the BOJ's expansion of a bank-loan program fell short of traders' expectations. Morgan Stanley revised its forecast for second-half growth to a range of 2 percent to 2.5 percent, from an earlier estimate of 3 percent to 3.5 percent.

MONDAY - YIELD CURVE REVIEW

The first day of the week is a day for preparation - in this regard we will take this opportunity to review the market.

Treasuries	Today	Last Week Close	6/30/2010	7/31/2009
3 mo	0.140%	0.145%	0.175%	0.181%
6 mo	0.181%	0.138%	0.222%	0.254%
2 yr	0.509%	0.502%	0.605%	1.115%
3 yr	0.814%	0.810%	0.966%	1.590%
5 yr	1.425%	1.442%	1.775%	2.516%
10 yr	2.596%	2.596%	2.933%	3.481%
30 yr	3.662%	3.640%	3.889%	4.299%

Callables v Bullets

	Bullet Sprd	Bullet Yld	Call Typ *	Call Sprd	Call Yield	v Bullet	1X Only	1X Yield	v. Bullet
2Y	0.184%	0.692%	2/1 NC	0.179%	0.688%	-0.005%	0.168%	0.677%	-0.016%
3Y	0.203%	1.017%	3/1 NC	0.216%	1.030%	0.013%	0.188%	1.002%	-0.015%
5Y	0.241%	1.667%	5/2 NC	0.288%	1.713%	0.047%	0.278%	1.703%	0.037%
10Y	0.261%	2.857%	10/3 NC	0.382%	2.978%	0.121%	0.297%	2.893%	0.036%

* Indications for "Continuously Callable" (Bermuda or American) securities. "1 Time Only" (European) Callables are 2/1; 3/1; 5/2; and 10/3 1X only.
 The "Callables v Bullets" section is updated weekly and may not reflect current offering rates exactly.

PORTFOLIO MANAGER'S REPORT

Indifference Rate Curve

What is the Fixed Rate alternative to Prime, to which my bank is economically indifferent? These are the types of questions we face every day in our own bank, and through contact with banks like yours who use our Asset Liability Subsidiary (AMG).

Loan Pricing is becoming more of a "SCIENCE", and less of an "ART". Especially in those markets where we "Community Banks" are faced with competition from our "Big Bank" colleagues. We can understand a little more about this issue if we can apply some of the tools that bigger banks use to calculate the "Indifference Rate", or the rate at which they are mathematically indifferent to a borrower, whether the borrower chooses to utilize a Variable or Fixed Rate Loan. This calculation may not always produce a rate that will WIN a highly competitive loan, but will help the bank to better understand the true cost of making a loan at a less than indifferent rate. We have created this Indifference Rate Curve to help in making this decision. We hope it makes you and your staff more confident in evaluating the credits you see on an ongoing basis.

If you would make the following variable rate loan to a customer:

<u>Prime Rate</u>		<u>Credit Adjust.</u>		<u>Var Offering Rate</u>
3.25%	+	0.00%	=	3.25%

Then you would have the following Fixed Rate Alternatives to which you would be mathematically indifferent:

These would be Non Prepayable Loans, an additional adjustment should be made for Prepayment Risk.

	<u>LIBOR SWAP</u>		<u>Spread</u>		<u>PRIME/3MO LIBOR</u>		<u>Credit Adj</u>		<u>FIXED</u> <u>Offering Rate</u>
1 year	0.42%	+	2.73%	+	0.00%	=	3.15%		
2 year	0.65%	+	2.69%	+	0.00%	=	3.34%		
3 year	0.95%	+	2.67%	+	0.00%	=	3.61%		
4 year	1.28%	+	2.65%	+	0.00%	=	3.93%		
5 year	1.62%	+	2.65%	+	0.00%	=	4.27%		
10 year	2.58%	+	2.65%	+	0.00%	=	5.22%		
15 year	2.97%	+	2.65%	+	0.00%	=	5.62%		
20 year	3.11%	+	2.65%	+	0.00%	=	5.75%		

Historical Fixed Indifferent Rates - Non Prepayable Loan

Average Maturity	<u>8/30/2010</u>	<u>Last Week</u>	<u>Last Mo</u>	<u>3 mos Ago</u>	<u>6 mos Ago</u>	<u>1 yr Ago</u>
Prime	3.25%	3.25%	3.25%	3.25%	3.25%	3.25%
1 year	3.15%	3.13%	3.21%	3.58%	3.19%	3.35%
2 year	3.34%	3.34%	3.42%	3.87%	3.73%	3.98%
